

Natural Stride is a proprietary blend of uniquely balanced ingredients, carefully designed for greater relief from swelling and painful joints. It also creates faster recovery times and superior performance in young and old animals alike. **Natural Stride** can enhance mobility and flexibility while protecting structural integrity in all classes of livestock. **Natural Stride** features the proven natural ingredient Cetyl Myristoleate (100% vegetable derived) - a powerful new nutraceutical for superior joint relief and performance.

Without question in the show ring today soundness is a necessity and with the advancements in genetics and performance we have stressed the structure of show livestock to the limits. As we continue to push the show animal of today to its highest potential we will also see more and more movement problems especially on those who are subject to greater joint stress with the use of paylean, optiflex, or other muscle enhancement products. Whether it's swelling, flexibility, joint pain or just wear and tear, **Natural Stride** is your answer. This revolutionary, one-of-a-kind formula has led to dramatic results. In addition, **Natural Stride** stands alone as being one of the first and **ONLY** joint supplements on the market without Glucosamine or MSM. The show industry has seen huge improvements in their animals' mobility due to **Natural Stride**. **Natural Stride** is used and recommended by veterinarians and industry professionals on young and old animals alike. Order yours today and use what the champions use.

NATURAL STRIDE **BENEFITS** THE JOINT IN **4** WAYS ...

1ST

It helps modulate or "calm down" the body's immune response to joint stress, enhancing joint recovery time, and minimizing damage from pain and activity.

2ND

Natural Stride can act as an anti-inflammatory, helping to reduce the symptoms of "inflammatory arthritis" and other conditions in which inflammation can lead to slow recovery, damage tissues, increased pain and restricted motion.

3RD

It can stimulate joint lubrication to help relieve stiffness, which improves mobility and enhances the natural range of motion.

4TH

Natural Stride has had an analgesic or "pain-killing" effect that may help to reduce joint pain, hence increasing your animal's comfort.

100% PLANT-BASED SOURCE

100% of the cetyl myristoleate in Natural Stride comes from the African kombo nut (wild nutmeg). This is a patent-pending feature and innovation available only in Natural Stride. Unlike using the more common beef-based source of cetyl myristoleate, Natural Stride offers a level of confidence and peace of mind that other joint supplements simply cannot match. Thanks to our exclusive plant-based kombo nut source of cetyl myristoleate, you don't have to worry about BSE or other potentially harmful substances such as animal viruses, residual steroids, growth hormones, antibiotics and other fragments that can occur in beef-derived products.

MAXIMUM POTENCY WITH HIGH PALATABILITY

Natural Stride is manufactured in granular form to ensure maximum potency and the greatest benefits for your livestock. How? Because in its granular form, Natural Stride is not subjected to the potentially degrading effects of heat and pressure required to create pelleted products. As an esterified fatty acid, cetyl myristoleate has a unique molecular structure, which gives it very specific properties in the body. Changing its structure (through heat, pressure or other means) can diminish its effects and potency in the body as a nutraceutical. So we leave it just the way it's supposed to be. Unlike most nutrients, your livestock cannot manufacture cetyl myristoleate in its body. It must be supplied and it must remain intact.

Natural Stride is molasses based to help ensure your animal's consumption is no worry.

Ingredients

Molasses, Salt, Kombo Nut (Cetyl myristoleate, plant source), Alfalfa Powder, Ascorbic Acid (vitamin C), Natural and Artificial Flavors, D/L- Methionine, Tocopherol Acetate (vitamin E).

Natural Stride comes in a convenient pail to help keep the product fresh!

- 20 lb. pail (2 scoops included):**
29.6 cc scoop = 460 scoops/pail OR 60 cc scoop - 228 scoops/pail. Approx. lasting time at maintenance level of 1.5 to 2.5 scoops (60 cc) is 90 to 150 days on cattle. **Retail Price: \$299.00**
- 5 lb. pail (2 scoops included):**
29.6 cc scoop - 115 scoops/pail OR 60 cc scoop - 57 scoops/pail. Approx. lasting time at maintenance level of 1 to 1.5 scoops (29.6 cc) is 90 days on swine, sheep, or goats. **Retail Price: \$82.00**

DIRECTIONS FOR USE OF NATURAL STRIDE

For best results, we recommend that you follow these directions for Natural Stride:

Initial "Loading" Period:

Mix with feed or grain. Depending on severity of animal, an initial "loading" dosage during the first 10 to 21 days is recommended.

- For Cattle administer two scoops (60 cc scoop) twice a day. For starting larger cattle (1,250+) administer three scoops twice a day.
- For Swine, Sheep, or Goats administer two scoops (29.6 cc scoop) twice a day. Results are usually evident within three weeks.

Maintenance Period:

Once desired results are being seen (10 to 21 days after start of 'loading period') begin administering a maintenance program of one to two scoops (60 cc scoop) per day on grower size cattle and 1.5 to three scoops (60 cc scoop) on finisher size cattle.

- On Swine, Sheep, or Goats administer .5 to one scoop (29.6 cc scoop) on grower size animals and one to two scoops (29.6 cc scoop) on finisher size animal.
- Maintain a higher rate due to the severity of the animal.
- Monitor your animals condition closely and adjust treatment levels as may be necessary for optimum results.
- Be sure to make clean, fresh water available at all times.

Administering Tip:

We all know that some animals can be a bit picky, so here's a tip: Add a small amount of water to Natural Stride and then mix it with the feed. The granules will stick to the feed and even the pickiest animal will eat it up eagerly!
