

“I have been showing cattle for 25 years and I know without a doubt, that without Stretch my daughter’s steer wouldn’t have won at NAILE. It kept him full as well as keeping the gut working as we were trying to meet all the weigh back requirements. I truly give Stretch all the credit on this big win.” – *Dave Guyer*

“Kate’s barrow looked great and was easy to manage at OYE with the help of Stretch. It kept him full with extra expansion and allowed us to really minimize his feed and concentrate on keeping him well hydrated. With the extra probiotic’s in Stretch we knew his gut would stay on track as well. All in all, Stretch was a major contributor in Kate’s success.” – *Ryan Sites*

GUARANTEED ANALYSIS ...

INGREDIENTS ...

Roughage Products, Forage Products, Molasses Products, Dextrose, Vegetable and Animal Fat (preserved with BHT), Dried Bacillus licheniformis Fermentation Product, Dried Bacillus subtilis Fermentation Product, Natural and Artificial Flavors, Saccharin Sodium, Sugars.

USAGE DIRECTIONS ...

0.5 to 2.0 lb/head/day for pigs, sheep and goats
2.0 to 5.0 lb/head/day for cattle or as needed

CAUTION ...

Don not feed to horses or other equines.

Natural Solutions for Livestock has been bringing you products that are “different” than anyone else has offered and everyone has a version of a “Fill” product. But ... this “Fill” product from NSL comes with a challenge that makes it different. The difference is it works the best and the challenge is for you to test it yourself!

Who wouldn’t give a scoop to feed and get the equivalent of three or more scoops of fill? I would any day of the week and especially on show morning!!

Stretch will do more than any other fill product out there. Plus with the extra probiotics, Stretch helps with digestion as it keeps the gut working. Take out 2/3 of feed ration per feeding 3 days prior to the show and add 1/3 of Stretch; increase Stretch for the more desirable show day fill that you are looking for. By doing this you can control their feed intake and you will be able to fill your animal as much or as little as you wish. If you are using a fill product on show morning only then its too late ... Prepare for show day!

Stretch is great to increase expansion of belly but also can be used as an economical source of filler in a holding ration. Yes it can cost more than beet pulp up front but you don’t have to use as much because it expands three times more. In most cases when you are trying to expand the belly on one you are also trying to add bloom. Normally we take too much volume away from the feed ration to add enough bulk to do any good, therefore we are not leaving enough ration to keep the bloom or fat coming. As we all know one will only eat so much volume so whatever you feed you need to make it count. Due to the extra expansion of Stretch you can do both, feed smaller amounts of bulk(Stretch) to expand the belly and still keep the volume of the feed ration up to continue to lay on fat or bloom.

Stretch can be fed to cattle, sheep, goats and pigs.
