Natural Stride for Equine is a unique and complete formula that combines the most sought after ingredients currently available. These ingredients work synergistically to provide you and your horse the greatest benefits possible. No other product on the market is as complete with a 100% plant sourced Cetyl Myristoleate.

With Cetyl Myristoleate and Hyaluronic Acid (HA)!
also including Glucosamine, MSM, Vitamin C and E, and Citrus Bioflavonoids!
How is Natural Stride for Equine different?

All the ingredients work together to provide your horse with maximum benefits and relief. Not only looking at the symptoms of arthritis but going after the root cause of the problem. Each therapeutic dose will help facilitate healing as well as providing your horse with a faster recovery time.

Ingredients Benefits:

Cetyl Myristoleate is an all-natural esterified fatty acid that dramatically help in joint function:

- It works at the cellular level and by modifying the immune system response to arthritis. It has a “calming” effect on the immune system.
- Acts as an all-natural anti-inflammatory, reducing arthritis symptoms and tissue damage.
- Helps lubricating the joints to improve flexibility and mobility (often referred to as the WD-40™ for the joint)

Glucosamine HCL is the most potent form of glucosamine. Glucosamine is a normal constituent of glycoaminoglycans in cartilage matrix and synovial fluid. It has been shown through many studies to alleviate pain and help rebuild cartilage.

MSM (methylsulfonylmethane) provides sulfur, a vital building block of joints, cartilage, skin, hair and nails, and methyl groups, which support many vital biochemical processes in the body, including energy production.

Vitamin C is a powerful antioxidant, fighting molecules, which trigger rheumatoid inflammation. Vitamin C serves a role as a co-factor in collagen synthesis, the main protein in joint tissue and bone. Vitamin C plays a role in fighting infection and may work to control inflammation.

Hyaluronic acid (also called hyaluronan or HA) is the primary component of the Synovial fluid found in the joints. As we age, hyaluronic acid level drops, which can cause our joints to become weak. Synovial fluid that protects joints is largely made up of hyaluronic acid and acts as a lubricant, shock absorber and nutrient carrier.

Given per serving (two scoops):

- Cetyl Myristoleate (100% Vegetable source) ..... 5500mg.
- Glucosamine HCL (Shellfish source) ............. 5000mg.
- MSM (MethylSulfonylMethane) .................. 5000mg.
- Ascorbic Acid (Vitamin C) .......................... 1000mg.
- Lecithin .................................................. 340mg.
- L-D-Methionine ........................................ 100mg.
- Citrus Bioflavonoids .................................. 75mg.
- Hyaluronic Acid ....................................... 50mg.
- Vitamin E (Tocopherol Acetate) .................. 50mg.

Included per serving (two scoops):

- Cetyl Myristoleate (100% Vegetable source) ..... 5500mg.
- Glucosamine HCL (Shellfish source) ............. 5000mg.
- MSM (MethylSulfonylMethane) .................. 5000mg.
- Ascorbic Acid (Vitamin C) .......................... 1000mg.
- Lecithin .................................................. 340mg.
- L-D-Methionine ........................................ 100mg.
- Citrus Bioflavonoids .................................. 75mg.
- Hyaluronic Acid ....................................... 50mg.
- Vitamin E (Tocopherol Acetate) .................. 50mg.
