

Synodrin[®] Ingredients

Complete Joint Rehab

Cetyl Myristoleate:

(CFA/ Cetylated Fatty Acid) Cetyl myristoleate is all-natural and seems to have the ability to normalize hyper-immune responses, to work as an anti-inflammatory as well as lubricating the joints (often referred to as the WD-40R for the joint).

Glucosamine HCL:

The purest form of glucosamine available. Glucosamine is a key component of the cartilage found in our joints.

Boswellia and Turmeric extracts:

Ayurvedic herbs which support consistent blood flow to your joints, boosting flexibility and strength. Studies have shown that boswellia and Turmeric extracts have an anti-inflammatory action, much like the conventional NSAIDs.

Hyaluronic Acid (HA):

All-Natural Hyaluronic Acid helps lubricate and cushion the joints.
